Subject: Instructions regarding effective management of plastic waste.

Sir,

I directed to refer to subject cited above and say that the Ministry of Environment, Forests and Climate Change has notified the Plastic Waste Management Rules, 2016 (PWMR, 2016) to manage plastic waste in an environmentally sound manner throughout their life cycle and Several States and UTs have implemented regulations supplementing PWMR, 2016 to ensure effective management of plastic waste.

The Hon'ble Prime Minister has also emphasized to curb single use plastic and phase out its use by 2022. In this context, your attention is also drawn to single use or short life Poly Vinyl Chloride (PVC) flex boards or posters being indiscriminately used in government institutions and offices for short term advertisement and other purposes. PVC, a plastic polymer, is a non- biodegradable material and if burned, releases toxic fumes such as

dioxins, furans etc. The harmful toxins may get bio-accumulated in the food chain of ecosystems causing a serious hazard to human health and environment. Thus reduction in use of avoidable plastics is necessary.

Thus it has been decided that use of single use or 'short life PVC flex for banners and posters in government offices or its functions should be strictly avoided. Alternatives such as cloth banners, light weight textile fabrics, wrinkle, resistant wrap knit, natural-fibre based sandwich boards, resin infused paper, particle boards etc. can be used,

These instructions may be brought to the notice of all concerned in the Departments for strict compliance and implementation.

Yours faithfully,

11-3-2020
