SUB: REQUEST TO SANCTION PROJECT - ONLINE AWARENESS AND CAPACITY BUILDING AND FRAMING OF STANDARD OPERATING PROCEDURES RELATED THERETO - EXTENSION SERVICES FOR PIG FARMING

REF: SIMILAR PROJECT FOR MHRD, GOVT. OF INDIA IN COMPLIANCE OF SOCIAL DISTANCING NORMS

Sir,

NITCON is a Joint venture of All India financial Institutions, State Level Government Corporation (SIDC, FC, PIEC, CITCO) and Public Sector Commercial Bank (PNB, SBI, CBI, UBI, PSB, UCB, OBC, BCI). We have team of professional on roll represents a vast cross-section of vocations: Management, Engineering, Finance, Economics, Energy Management, Marketing, Entrepreneurship, Development, Computer etc. A Multi-disciplinary in-house professional expertise fully geared and experienced to handle diverse Technical and Management assignment. We are actively engaged in healthcare Sector for activities like Skills development, training and capacity building, online testing and certification in the healthcare sector with Government agencies. NITCON accounts are audited by Auditors appointed by Comptroller and Auditor General (CAG) of India, New Delhi.

EDUCATIONAL ACTIVITIES OF NITCON

We have extensive exposure in education / training sector some of which are as under:

1. Infrastructure audit of Government Schools for gap identification and remedial actions.
 2. Remedial teaching in Government Schools for improving learning outcomes in students.
 3. Online Teacher Training to equip them with 21st century teaching skills and improve learning outcomes as proposed under the Samagraha Shiksha Scheme of the Department of School Education & Literacy, Ministry of Human Resource Development, Government of India.
- Massive Open Online Courses with online testing and certification with Punjab University, Patiala.

5. R & D and test beds for cutting edge technology with DM University, Government of Manipur.

COVID 19 IMPACT ON GOVERNANCE

Post-World War II, not so many countries around the world gone into lockdown at around the same time and for the same reason. The COVID-19 pandemic adversity has compelled institutions across the world to suddenly harness and utilize the suite of available technological tools for remote online interaction in conduct of day to day business / continuity of work and life.

However, this adversity has compelled us to prepare our manpower to ensure continuity of work in case of present and future pandemics. This is important keeping in mind the fast pace at which the world has been hit by different virus strains like MERS / SARS / EBOLA and now CORONA. Thus, we need to be prepared so that in future should such a lockdown happen, the continuity of work is ensured. For day to day conduct of business, videoconferencing has become de rigueur for work and social life as people around the world hunker down at home to avoid spreading the deadly coronavirus. Due to digital revolution all devices be it laptops / desktops / mobiles / tablets allow us to work in online mode.

ABOUT TECH PENETRATION IN INDIA

COVID 19 has forced the entire society be it rich or poor, young or old that technology shall have a much larger role in our day to day existence. It is also pertinent to mention that the students in our educational institutions today and tomorrow belong to Generation Y (those borne between 1980-1994), Generation Z (those born between 1995 to 2009) & Generation Alpha (those born from 2010 to 2024) are born in an interconnected world. It is much earlier to connect to them and their families by leveraging technology.

NITCON'S WORK FOR ONLINE TRAINING MHRD, GOI AS A POST COVID 19 RESPONSE

In this regard, it is stated that NITCON Limited has recently executed a project for MHRD, Government of India where Government School Teachers were trained to use Google Meet Platform to impart online education and interact with stakeholders for day to day academic activity wherein NITCON was paid a fixed service charge @ Rs 21,000/- per teacher for a 30-day online training session (**ANNEXURE I**). It is reiterated that the entire training is conducted in online mode and there is no physical training involved.

OUR PROPOSAL

As online working shall become a norm in many areas of governance, more so at the District Level where all the developmental schemes of the Central/State Government are deployed on the ground. Many of these schemes required workshops/outreach programs for awareness building by District level officers to the stakeholders. However, on account of COVID 19 and social distancing norms, such workshops /extension awareness programs may not be possible in the current year and District Administration may need to use online interaction tools to connect to stakeholders wherein one such tool most commonly used is Google Meet Platform.

In this regard, NITCON can provide services as under:

1. **Healthcare Domain** – Training of ASHA and ANM workers to use Google Meet Platform for community surveillance and other healthcare awareness initiatives.
2. **District Red Cross Society** – Capacity Building for Beti Bachao Beti Padhao and Disaster Preparedness.
3. **Government School teachers in rural areas** – Capacity building for taking online classes.
4. **Agriculture Extension Officers** – Farmer a welfare related schemes, crop disease protection advice, information regarding availability of inputs like fertilisers, seeds, subsidies etc.
5. **Veterinary Services** – information regarding annual disease control, vaccination etc.
6. **District Level Banker's Committee** – Information regarding various schemes for MSMEs as well as paper work related thereto etc.
7. **Protocol for Upcoming Census Operations**

Hence, in case these suggestions align with the developmental objectives at the District Level, then a Nodal officer may be appointed to have discussions with us regarding execution of such projects including establishment of SOP/Financial implication with respect to its execution in the state.

Any queries in this regard can be addressed to the undersigned through email on nitconpsu@gmail.com or 9888367113.

Your sincerely

Mehernook Rani

TO WHOMSOEVER IT MAY CONCERN

This is to state that CTSA, Department of School Education and Literacy, Government of India has engaged the services of M/s NITCON Limited to conduct an **ONLINE TRAINING PROGRAM FOR TRAINING TEACHERS TO ENABLE THEM USE TECHNOLOGY TOOLS TO TAKE ONLINE CLASSES AND FRAME STANDARD OPERATING PROCEDURES FOR SMOOTH CONDUCT OF ONLINE CLASSES** covering the following

1. Sample Plan for Teachers
2. SOP (Standard Operating Procedures) for online classes
3. Use of software platforms for online classes
4. Sample Notice To Parents / Guardians
5. Observation and feedback protocols

That CTSA has approved unit cost @ Rs 21,000/- per teacher for a 30 day online training session. This is in compliance of the directions of Ministry Of Human Resource Development, Government Of India to use technology for imparting education / social distancing norms in govt educational institutions post COVID 19.
